

What people are saying about TRAIN:

“This free learning tool should be utilized by all volunteers and leaders to assist and support each other nationally through the development of training and actually conducting training.”

~Stephanie Walker (Anderson County MRC)

“Folks around here are really excited about DE-TRAIN. Taking your advice, I've done 2 conference room meeting demos on DE-TRAIN and now have some major support from top management.”

~Rudolph Bailey (Delaware)

“Having been a ‘trainer’ for more years than I want to admit, having a resource like TRAIN is a dream come true!”

~William Wetter (Kentucky)

What is TRAIN?

TRAIN is a learning management system with a centralized, searchable database of courses relevant to public health.

Through TRAIN, users have access to thousands of public health courses from nationally recognized course providers. These courses are offered in the form of web-based learning, on-site learning, and satellite broadcasts.

A user can browse this course listing or perform a search by keyword, subject area, course provider, or competency.

Learning is captured in the form of an online transcript. This personal, printable course transcript is maintained for every registered user.

The database of learner records can be queried to generate tailored reports with regard to course rosters and individual learning, making TRAIN a valuable tool for the management of public health workforce/volunteer development.

A Prepared Public Health Workforce Begins with TRAIN

TRAIN benefits the field of Public Health...

Training is offered in 60 subject areas
Through TRAIN, skills and competencies are built and developed
Course providers across the nation post their courses on TRAIN, making thousands of learning opportunities available
Varied modalities of training are accessible
Each registered user has a personal transcript
TRAIN is continually being upgraded by the public health community to better meet needs that are expressed

TRAIN affiliate states can...

Establish a training plan specific to position or employee using existing courses and assign the plan to volunteers
Post training opportunities online
Capture participation in competency-based training
Utilize pre and post test measures
Share resources with the TRAIN community
Avoid duplication of training by utilizing courses already developed, saving time and money
Send rapid announcements to all registered learners
Post tailored announcements to specific subsets of registered users
Generate reports about public health workforce training

Quick Facts about TRAIN:

- *Built on TrainingFinder, a familiar resource used by over thousands of professionals
- *23 States and 2 National affiliates are participating with more expressing interest
- *More than 220,000 registered users
- *Over 7,900 public health courses
- *More than 2,200 course providers, including APHA, OSHA, CDC, PHTN, WHO, FEMA, and Centers for Public Health Preparedness
- *A majority of all courses are completely free
- *Many courses offer CEU's or college credit and a significant percentage of those courses are free
- *Based on projections and calculations, the TRAIN community will save participating affiliates an estimated \$11 million over 5 years due to the availability of training. This access will reduce course duplication and travel as well as provide access to a platform for Just-In-Time training.
